The new shade structure over the EVOS playground at Sunset Palms Park is in — just in time for the summer heat! This project was funded in part with SahuarO District funds.

Transportation Plan. A year ago, the city of Glendale began updating its long range transportation plan to address the needs of future growth, particularly the areas along Loop 101 and Loop 303, which has been designated as a growing business and entertainment corridor. In addition, the city anticipates more cars travelling along major arterials and through neighborhoods, and this plan will face the upcoming traffic and transit challenges, while providing recommendations on how to best serve the traveling public in Glendale.

During the last year, citizen input was obtained through surveys and public meetings. The information gathered helped identify street improvement, transit and bicycle projects for the plan update. The plan also includes cost estimates and possible funding strategies.

The City is currently seeking additional input into the draft plan update. Please click on the link below, review the plan presentation and then click on the survey link to tell us what you think.

Thank you for your time and input! Your comments will be used to revise the draft plan before it is submitted to the City Council for final approval.
